**BULBS, FERNS, ORCHIDS,**

.....AND.....

*Bog Plants*

For the Summer and  
Autumn of '94.

BRIGHAM & BRIGHAM, PRINTERS.  
BURLINGTON, VT.

# TO MY PATRONS.

The plants herein offered have been arranged in sections, to enable my customers to select what they require without an endless search.

Most of the bulbs have been planted at least one year in beds, and are therefore larger, stronger, and will give better satisfaction than the ordinary collected stock. Early orders will be filled from such stock.

I shall have better facilities for furnishing good, strong Mexican bulbs at very low prices than ever before. Mr. C. G. Pringle, who has been traveling in that country for several years, will keep me supplied with the best of everything.

I guarantee all plants to be well ripened, of good flowering size, and to reach the purchaser in good, healthy condition.

## **TERMS.**

Accounts are due January 1 and July 1. Good reference is required of unknown correspondents.

Prices are in American money, six at dozen rates, 25 at 100 rates, and 250 at 1,000 rates. No charges for packing. An American dollar is worth a little more than four English shillings, four German marks or five francs.

Plants are sent off as soon as well ripened, mostly from July to November.

Address

**F. H. HORSFORD,**

*Charlotte, Vermont, U. S. A.*

## SECTION I.

### Bulbous Plants from the Pacific Coast,

Including those from Southern California to Washington.

#### BRODIAEA.

These are among the easiest of plants to cultivate, and thrive in any good garden soil that is rich and well-drained. They like plenty of moisture in the spring until past flower, then dry weather suits them best. They have long grass-like leaves from the base, while the stem which bears the flowers is naked and of good length for cutting.

	Doz.	100	1,000
<b>BREVOORTIA (Brodiaea) Coccinea.</b> 2 to 3 ft. high, with crimson flowers; one of the finest. . . . .	\$0 50	\$2 50	\$15 00
<b>BRODIAEA capitata</b> 1 ft. high, with purple flowers . . . . .	50	2 50	12 00
<b>congesta.</b> Purple flowers . . . . .	50	3 00	15 00
<b>filifolia.</b> . . . . .	1 50		
<b>grandiflora</b> Very large, glossy purple flowers . . . . .	50	2 00	12 00
<b>Hendersoni.</b> Yellow, purple stripes . . . . .	2 00		
<b>Howellii.</b> White or light blue flowers . . . . .	1 00	4 00	
<b>lactea.</b> 8 to 12 in. high; flowers white banded with green. . . . .	50	2 00	12 00
<b>laxa.</b> Tall; many large, blue flowers . . . . .	50	2 00	12 00
<b>ixioides.</b> Low; flowers light yellow, banded with green. . . . .	50	2 00	12 00
<b>multiflora.</b> 6 in. high; flowers purple. . . . .	50	3 00	15 00
<b>minor.</b> . . . . .	1 00	5 00	
<b>Orcuttii.</b> . . . . .	1 50	7 00	
<b>terrestris</b> Similar to <i>B. stellaris</i> . . . . .	1 00	5 00	
<b>peduncularis.</b> Flowers glossy purple, on long stems . . . . .	1 00	5 00	
<b>volubilis</b> ( <i>Stropholirion Californicum</i> ). A climber; pink flowers. . . . .	1 00	5 00	
<b>stellaris.</b> Low; very handsome; rich purple, white center. . . . .	50	2 50	15 00
<b>ALLIUM Cusickii</b> . . . . .	1 75		
<b>validum</b> . . . . .	1 00		
<b>acuminatum</b> . . . . .	1 00		
<b>attenuifolium</b> . . . . .	1 25		
<b>Bidwelliae.</b> . . . . .	1 25		
<b>falcifolium</b> . . . . .	1 25		
<b>fimbriatum.</b> . . . . .	2 00		
<b>falcatum.</b> . . . . .	2 00		
<b>Nevii.</b> . . . . .	1 00		
<b>madidum.</b> . . . . .	1 25		
<b>platycaule.</b> . . . . .	1 25		
<b>serratum.</b> . . . . .	1 00		

#### CALOCHORTUS OR BUTTERFLY TULIP.

They are always interesting on account of the various brilliant colors of their erect cup-like flowers. Very nice for winter forcing, and do splendidly in pots.

	Doz.	100	1,000
<b>CALOCHORTUS Leichtlinii.</b> Flowers creamy white, banded with ostrich-green . . . . .	\$0 75	\$3 50	\$25 00

## SECTION II.

### Southern and Mexican Bulbs.

There is no class of bulbous plants so easy to manage as these. They are planted in May, mature before winter, and may be taken up and wintered in a cellar, or protected from frost by a covering of some sort. As a rule these bulbs give much better satisfaction in cultivation than the California bulbs. They not only increase in size of bulbs and of flowers, but most of them multiply readily. A well drained clay loam suits them, though sandy or gravelly soil will answer. Most of them are ripe for shipment by the first of November, some earlier.

	Doz.	100	1,000
COOPERIA pedunculata. White flowers.....	\$0	50	\$3 00 \$15 00
Oberwetteri. White flowers .....	50	3	00 15 00
